

ESG Handbook

2025

Based on the FY 2024 Fila Group Annual Report – Consolidated Sustainability Statement

Colouring the future Since 1920

"My grandfather's business began in Florence and expanded to Sicily. My father's stretched from Milan to Sicily. Today, our business operates from Shanghai to San Francisco, with India being our second largest market, after the USA.

However, our roots are firmly planted in Italy, despite the global journey we have made. Over the years, we have adapted to evolving times and technologies, incorporating sustainable materials and practices into our business, while holding true to our key values: colour and craftsmanship. We like to picture an artist climbing a hill with her tools, ready to capture the beauty of the landscape before her. At F.I.L.A., we believe our future lies on that hill."

Massimo Candela, CEO of F.I.L.A.

Our Group

With a portfolio of 25 iconic brands and a comprehensive range of products for writing, drawing, colouring, modelling, and painting in the School and Fine Art & Crafts segment, the F.I.L.A. Group has become a major global player in the world of colour. Our products are distributed in 150 countries on five continents, with 32 direct subsidiaries and a workforce of over 3,200 employees.

Our company's vocation is production, with 22 specialised factories located across the world, including two in Italy. These factories boast high levels of interchangeability, and vertical integration, allowing us to have full control over the production process.

The parent company F.I.L.A. S.P.A. has been listed on the EXM – Euronext STAR segment of the Italian Stock Exchange since November 2015.

- Refinement of the KPIs

Strategic plan 2025-2029

The new **five-year Strategic Plan** is based on four levers, among which - as testament to our comprehensive ESG vision - is the Sustainability Plan. The Strategic Plan was **approved by the Parent's Board of Directors on November 12, 2024**, defining the new guidelines for the Group's growth.

1.

GROWTH

Development of new business areas

Reorganization of the Group
Launch of new product lines

Efficiency and profitability improvement

Digital transformation

Strategic M&A operations

2.

CASH GENERATION

Group cash pooling

Working capital optimization

Rationalization of product offerings

Improvement of inventory turnover ratios

Payment conditions

3.

SUSTAINABILITY

Sustainability governance

Respect for the environment and resources

Enhancement, respect, and development of people

Health and safety at work

Safe and quality products

Sustainable supply chain

Support for local communities

4.

GOVERNANCE

Solid and transparent governance

Organization and structures

Systems & Cyber Security

Sustainability plan 2025-2029

Our forward-looking approach is reflected in the new **2025-2029 Sustainability Plan**, which further integrates the Sustainable Development Goals (SDGs), outlined in the 2030 Agenda for Sustainable Development, and the “Ten Principles” of the United Nations Global Compact (UNGC), into our business model in a more structured way.

The primary aim of drafting the 2025- 2029 Sustainability Plan, part of the Group's Strategic Plan, is **internalising sustainability topics within every corporate activity.**

1. SUSTAINABILITY GOVERNANCE

Commitment to ensuring maximum transparency in all business, decision-making, and operational processes, integrating environmental, social, and governance factors, and combating corruption. Implement and spread the culture of sustainability among all stakeholders

2. RESPECT FOR THE ENVIRONMENT AND RESOURCES

Protect ecosystems related to water, improve water efficiency, reduce environmental impact, increase energy efficiency, and use clean technologies in production activities, combat climate change

3. ENHANCEMENT, RESPECT, AND DEVELOPMENT OF PEOPLE

Value people and spread an inclusive culture of respect and equal treatment in the protection of every difference, not just gender

4. HEALTH AND SAFETY AT WORK

Ensure health and promote a safe and protected work environment for all workers

5. SAFE AND QUALITY PRODUCTS

Promote sustainable policies aimed at maintaining and improving the quality and safety of our products

6. SUSTAINABLE SUPPLY CHAIN

Oversee the supply chain by prioritizing operators who can guarantee inclusive employment and decent work and who favor the sustainable management of natural resources

7. SUPPORT FOR COMMUNITIES

Promote social projects, educational programs, and collaborations to improve collective well-being

Target of F.I.L.A. Group

In line with the strategy adopted in recent years and the **2025-2029 Sustainability Plan**, the F.I.L.A. Group continues to pursue its sustainability targets, which were defined in 2022 and reported for the first time in 2023: **six specific short-and medium-term targets**.

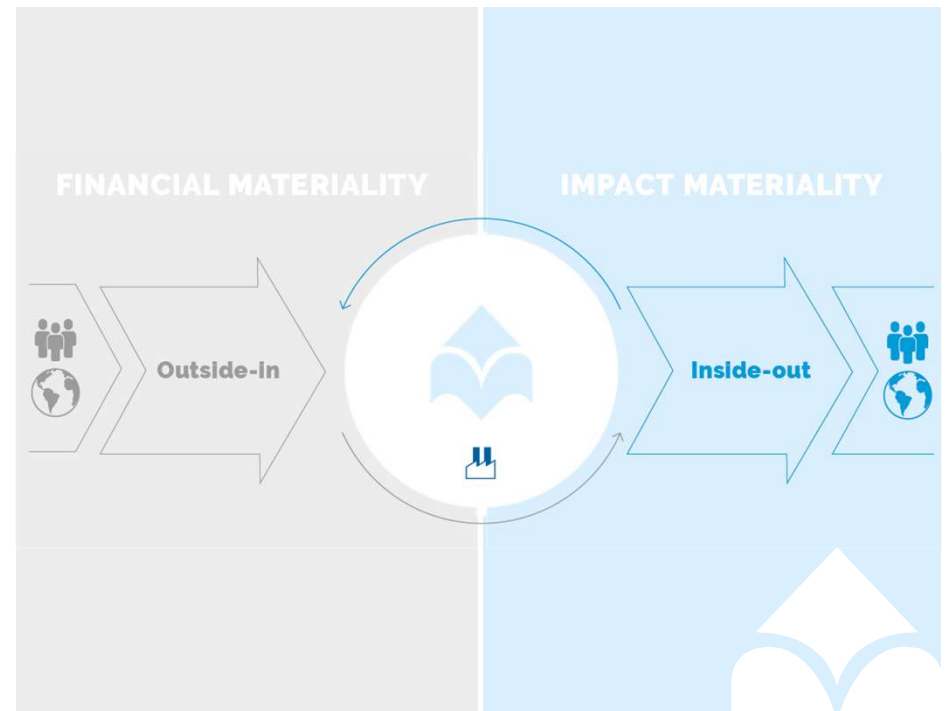

Target	Deadline	Progress at the end of 2024
50% reduction in CO2 emissions (Scope 1)	2027	-25.34%
Adoption of ISO 14001 environmental certification for all production plants	2025	59%
20% reduction in water withdrawals	2027	- 15%
Adoption of ISO 45001 health and safety management certification for all production plants	2027	59%
10% increase in average hours of training provided to employees in the 2023-2025 period, compared to 2022	2025	Delayed
Adoption of a Code of Conduct for Suppliers and Business Partners and Green Procurement for 90% of suppliers of goods with a turnover of more than Euro 10,000.	2024	91%

Double Materiality Analysis

The F.I.L.A. Group has conducted a double materiality assessment to analyze impacts, risks, and opportunities across the entire value chain, also considering external influences. The analysis was based on two interconnected dimensions: impact materiality, referring to significant effects on stakeholders and the environment, and financial materiality, which considers external sustainability factors that may influence the Group's development and performance. Following EFRAG guidelines (IG 1 Materiality Assessment), the Group identified and assessed IROs (Impacts, Risks, and Opportunities) related to: energy, climate change mitigation, water discharges and consumption, waste, resource inflows and use, health and safety, collective bargaining (including the percentage of workers covered by agreements), human rights, training and skills development, measures against workplace violence and harassment, and work-life balance.

The assessment did not result in changes to the business model or current financial effects. The Group considers its strategy resilient and capable of addressing risks and seizing identified opportunities.

health and safety
management certification

Social

As the Group operates in many countries, it seeks, within the scope of its own operations, to promote relationships with the local communities and to contribute to local development.

+1,9 mln euro

Donated funds were allocated as follows: to initiatives that promote culture and education, including university conferences, museum support, assistance for schools and teachers, scientific research, healthcare, sustainable fashion, community support and partnerships with volunteer organizations.

Supplier assessment and management

To establish transparent, fair, and ethical business relationships with its suppliers and business partners, F.I.L.A. has defined a **“Code of Conduct for Suppliers and Business Partners”** which F.I.L.A.’s suppliers are required to sign and adhere to.

Green Procurement questionnaire to track and examine, through the involvement of suppliers, the main environmental issues of the Supplier Companies.

Environment

Over the years, the F.I.L.A. Group has increasingly focused on recycling raw materials used in its production processes, wherever technically feasible. In particular, the production of timber slats for pencils involves reusing primary manufacturing rejects—such as undersized slats joined using “finger joints”—as well as narrow timber slats repurposed for the production of art canvases.

To support the environmentally sustainable development of our products, we have implemented an internal protocol aimed at promoting eco-friendly solutions, reducing packaging materials, and progressively enhancing product performance.

133,941 MWh of Group energy consumption, with 12% from Renewable Sources

87% of bio-based materials are FSC/PEFC certified

The production of plastics derived from plant-based or renewable resources is part of our strategy to reduce CO₂ emissions, a major contributor to greenhouse gases.

Among the first significant steps in this direction are the development of durable school containers, such as Giotto schoolbags, Giotto jars, and the new Giotto Bebè egg-shaped toy container—all made from 100% recyclable plastics sourced from renewable or plant-based materials. To guide the environmentally sustainable development of our products, we have introduced an internal protocol that promotes eco-friendly solutions, reduces packaging materials, and continuously improves product performance.

Environment

13 out of 22 production plants

possess ISO 14001 environmental certification.

In 2023, a multi-year investment plan was approved with the goal of reducing CO₂ emissions by over 6,000 tonnes per year through the construction of a biomass plant at the Canson SAS paper mill in France, which will become operational at the end of 2025 or beginning of 2026.

10,246 Scope 1 emissions: ton of CO₂

20,152 Scope 2 emissions: ton of CO₂

101,801 Scope 3 emissions: ton of CO₂

During the first year reporting year, proxy data was applied

FILA GROUP

The image features the FILA GROUP logo centered over a background of several overlapping, torn pieces of paper. The papers are in various shades of beige and light brown. One piece of paper in the upper right has the text "Arches FRANCE" printed on it. Another piece in the lower right has some faint, partially legible text that appears to include "FILA". The overall aesthetic is clean and modern, with a focus on the company's branding.
